

B-3303 - B-3320

1841-1855/1920's

1001-1061 S. Charles St. (East side)
Baltimore, Md.
Private access

The east side of the 1000 block of S. Charles St. is improved by a variety of types of combination commercial/residential brick structures. At the northern end of the block there is a group of two and a half story, late Federal style houses built in the 1840's (1001-1011 S. Charles St.) of which 1001 has been enlarged to three stories in height with a shed roof and 1003-1007 have had bracketed cornices added to the original two and a half story form, and 1009-1011 has had a new, shed roof added to a modernized exterior. Moving towards the south one finds a group of two story plus attic, two bay wide houses (1015-1031 and 1035-1039 S. Charles St.) of which 1021-1023, 1025-1027, 1031, and 1039 have been enlarged to a full three stories in height and now have shed roofs and bracketed cornices. Finally, there is a group of three story, gable-roofed houses (1033, 1041-1059 S. Charles St.) built in the late 1840's and early 1850's. Of this latter group, however, only 1041-1043 S. Charles St. retain their original gable roof slope--the others have had false shed roof fronts, with bracketed cornices, added, or have had the original gable roof rebuilt as a shed roof and a bracketed cornice added. All of the buildings on this side of S. Charles St. currently serve a mixed commercial/residential use and a number are now in the process of being renovated and refurbished. John S. Gittings and his partners Randle Moale and Robert Purviance were responsible for the development of this side of S. Charles St. and built the majority of the houses in the northern section of the block. Henry Strube, a local carpenter, built the row of gable-roofed houses extending from 1049-1059 S. Charles St. The original house at 1061 S. Charles St. (part of Strube's row) has been replaced by a one story high, Art-Deco influenced brick building with round arched windows that extends back along Cross St. Built in the 1920's as a bank, the structure now serves as a local tavern.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This two story brick house with gable roof and a single dormer window was built in the 1840's and formed part of a group of gable roofed houses extending along this side of Charles St. The first floor area has been converted into a store-front and a late Victorian metal cornice has been added.

The house is two stories in height, 16' wide, and occupies a lot 120' deep. The house is constructed in running bond. The gable roof has a single dormer window. There is a later stamped sheet metal cornice consisting of a deeply projecting crown molding set above a row of dentils and a row of embossed egg-and-dart motifs. Three grooved brackets connect the cornice to a lower molding strip. The two end brackets terminate at their upper edges in plain, rounded "anthemions." There is a single rectangular chimney located along the front roof gable on the south side of the house and a single hooded chimney located along the south side of the rear roof gable.

The second floor window openings have splayed brick lintels and wood sills. All of the window openings are filled with 1/1 double hung sash. The first floor area has been converted into a store-front. There is a central glass and panel door flanked by two three-sided plate glass shop windows set on wooden bases. A deep sign area of vertical wood siding is set above the shop windows and below the metal cornice which extends across the entire width of the store-front. The cornice consists of a deeply projecting crown molding decorated with a row of dentils set above a row of modillions, a row of smaller dentils, and a plain freize area. The entrance is reached directly from the sidewalk. A flat-roofed alleyway runs back under the northernmost bay of the house.
